- Alle Religionstraditionen welche das "**AUM**" rezitieren und verehren ,
 - beschreiben die Essenz desselben , - als jene Stille - oder jenen als Göttlich empfundenen Frieden , der nach dem Singen des "**AUM**" von selbst (- und aus unserem und allem Selbst) erwacht und eintritt **!!!**

Gleichzeitig entsteht und weilt hier jedoch auch eine höchst außergewöhnlich – besondere Stille auf radiästhetischer Ebene :

Während – und insbesondere nach dem Singen und Rezitieren des –

“ ॐ - OM - AUM - Omega - MEGA - OM ”

– entschwinden höchst überraschenderweise in weitem Umkreise auch jegliche Material – spezifischen **Polaritäts – Strahlungs – Achsen** !!!

Und wenn es hier nun keine (- *in dual – weltlichen Zusammenhängen , - auch als feinstofflich - energetisches Regulativ nicht und niemals zu umgehende*) Polaritätsachsen mehr gibt , (- hier ebenso im tiefsten Sinne von immerwährendem **NAMA-SMARANAM** und von **MAN-TRAM** – Gebeten ,)

SAT - CHIT - AANANDA

KRISHNA - NARAAYANA

- Symbol of Lord VISHNU and KRISHNA - as the Essence of Thee ABSOLUTE -
Existence Reality - Consciousness - Bliss Ecstasy Delight

The basic "AUM" - Whirl - or - Vortex - Flow

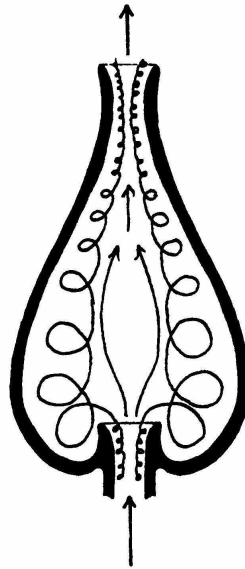

- 2 -

“ **AUM** ” – whirls , – how they will be initiated by singing Thee “ **AUM** ” , –

- one as a technically and pure symmetrical drawing , – but which is looking a little bit like sick ; -
- the other one , drawn by hand , – with some small (- also human body – alike , - asymmetrical -) irregularities , – but looking now natural , healthy and full of vitality .

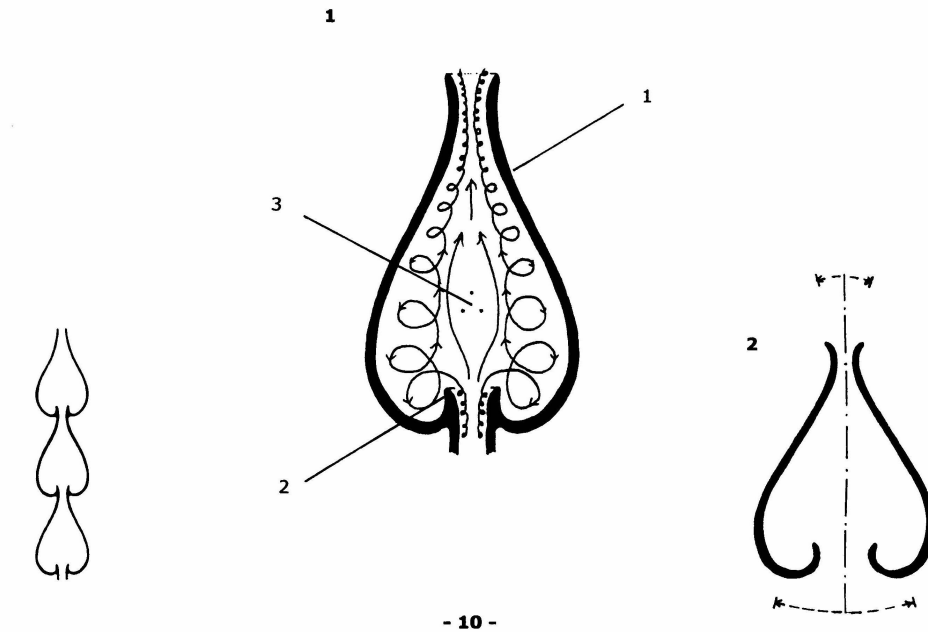

Therefore all future drawings were made mostly by hand !!!

- 9 -

If an "AUM" – flow will be stable with enough of structure – building material inside , – after some time there may be growing such an "AUM" – whirl – structure , – with the same potential to initiate an "AUM" – whirl – structure behind his outflow – nozzle ones more .

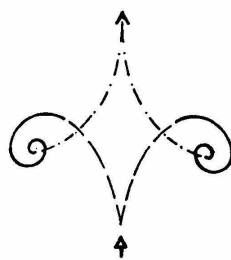

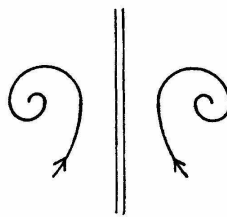

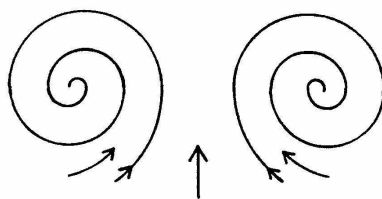

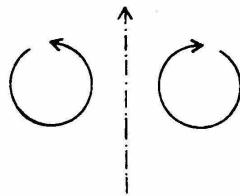

In the same way , – all (- forms of) living beings of every generation are embodiments of "AUM" – whirl – structures , of Sri GANESHA – and the YONI , - of Shiva – SHAKTI DEVI – MA .

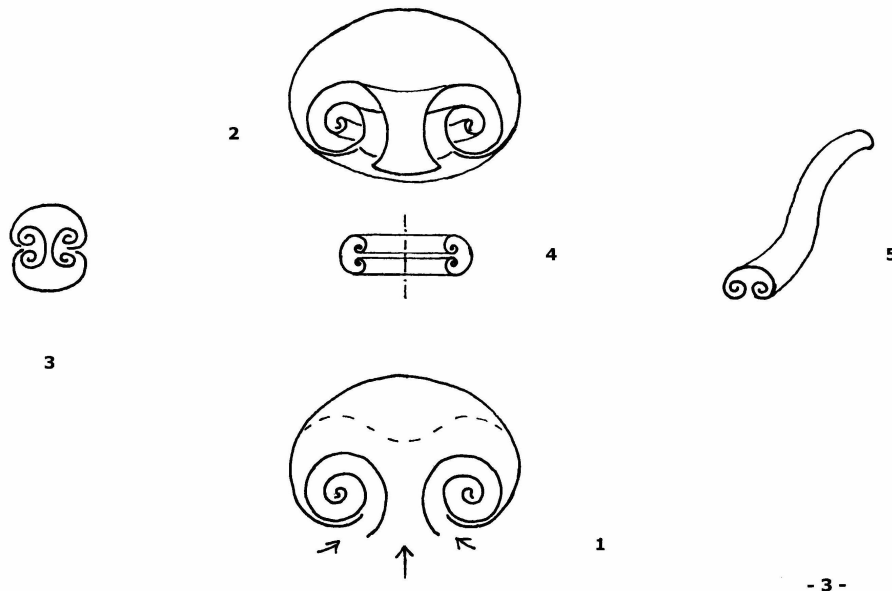

- 10 -

Inside of " **AUM** " – whirl – structures there are (- seem to be) three different together acting flows :

- **O**ne expanding and whirling left – and one expanding and whirling right – side (- but both (- also alike female and male) truly being one and same) , - both protecting its shoreline and system ;
- **A**n other one , between these both primary whirls in a region of suction and undertow .

“ AUM ” – whirls , - in their moving - progress .

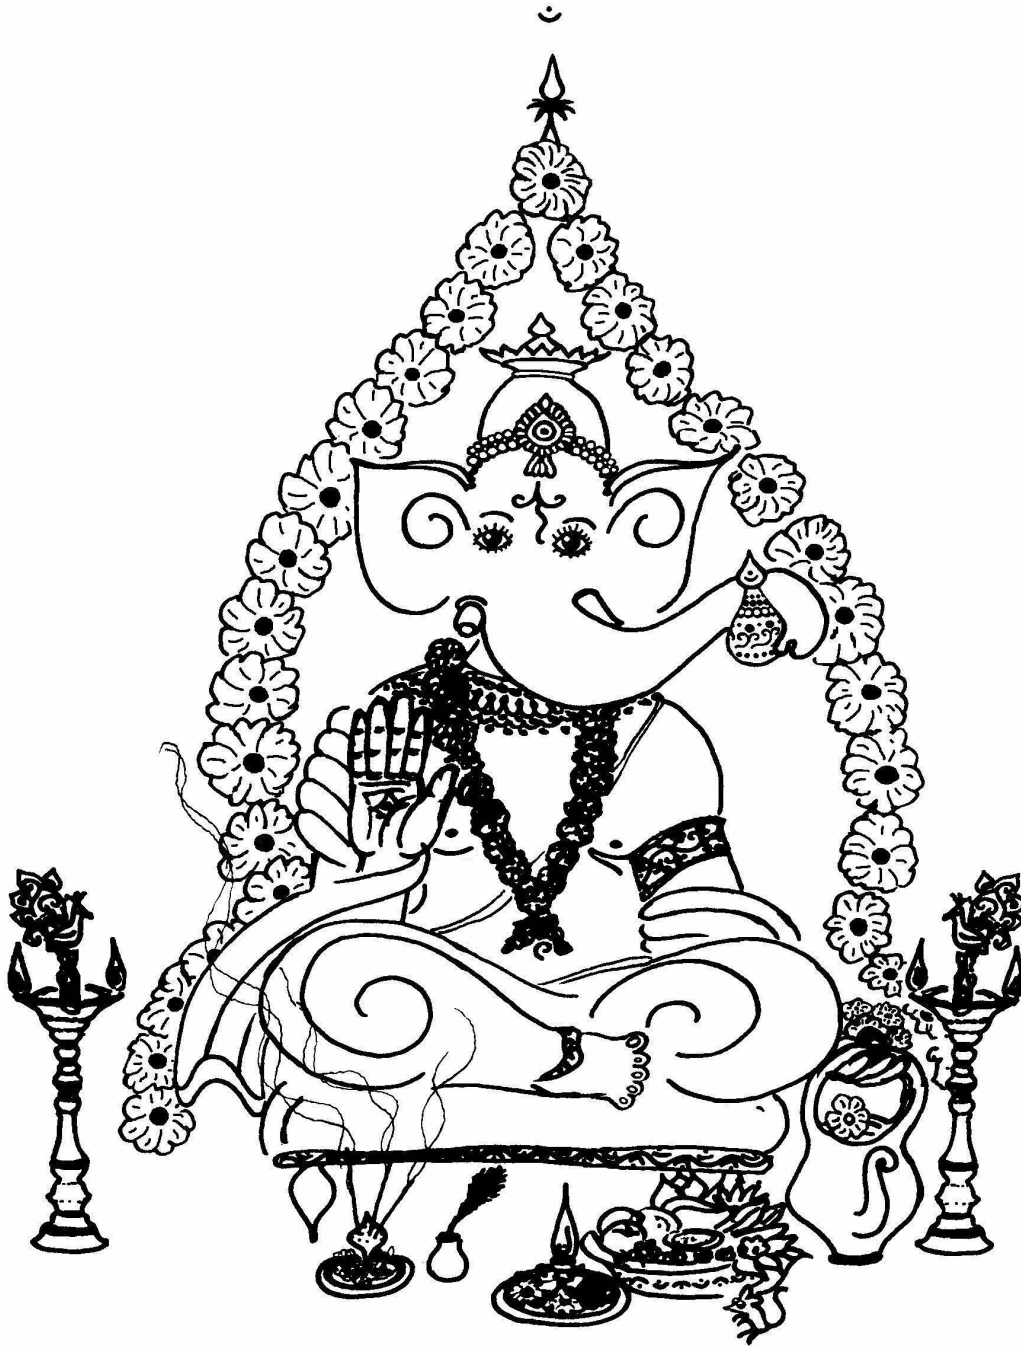

- 3 -

Different and also for technical usages possible (- if whirling upwards or horizontal ; - subtle harmony creating -) " **AUM** " - whirls .

Are we knowing some of these basic forms , also as growing - whirl - structures , - for evolutionary growth (- also to limit size and growth) we need beside of flow also time , counted through waves and pulses .

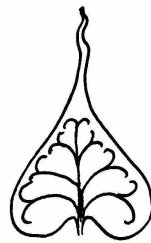

Are flows always pulsing (- however their medium is water , blood , air , melted lava , pedestrian traffics or whatever -) , - in our bodies there are many flow - created and the whole body - system (- like being awake or asleep , the functions of cells , organs , the heart , peristaltic systems , the nerves and brain etc.) regulating pulses ; - whereas we could see that inside of the sheets of cells there are some special fluids creating physio - chemical (- here also highly interesting - " **AUM** " - whirl -) - spirals , who are pulsing like a clock in highly defined rhythms .

So also here we see that through **Thee** " **AUM** " - and " **AUM** " - whirls , - (- **VEDA** - is true , -) time , pulse and rhythm is created in addition as well .

SRI GANESHA

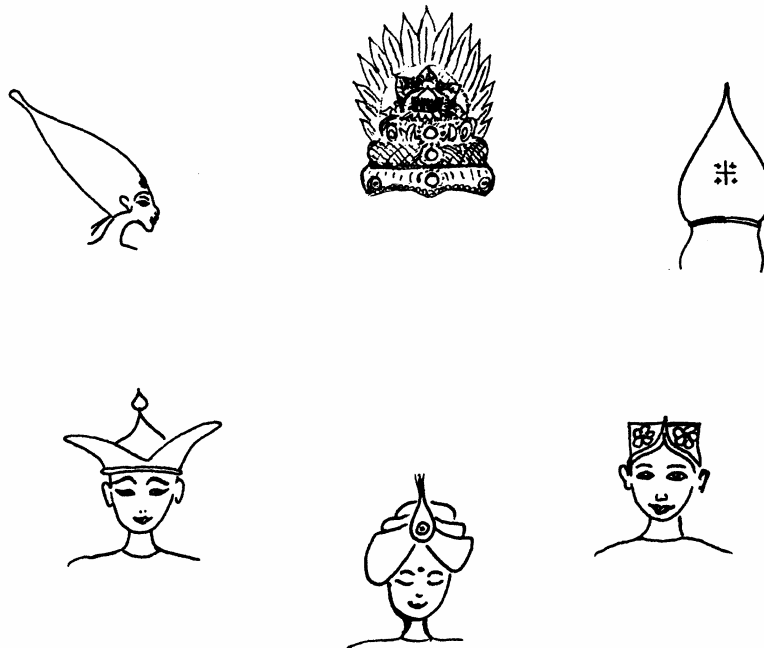

Thee embodiment of "OM" and "AUM" – whirl – structures

- 66 -

Transformative " AUM " – whirl – structures , –

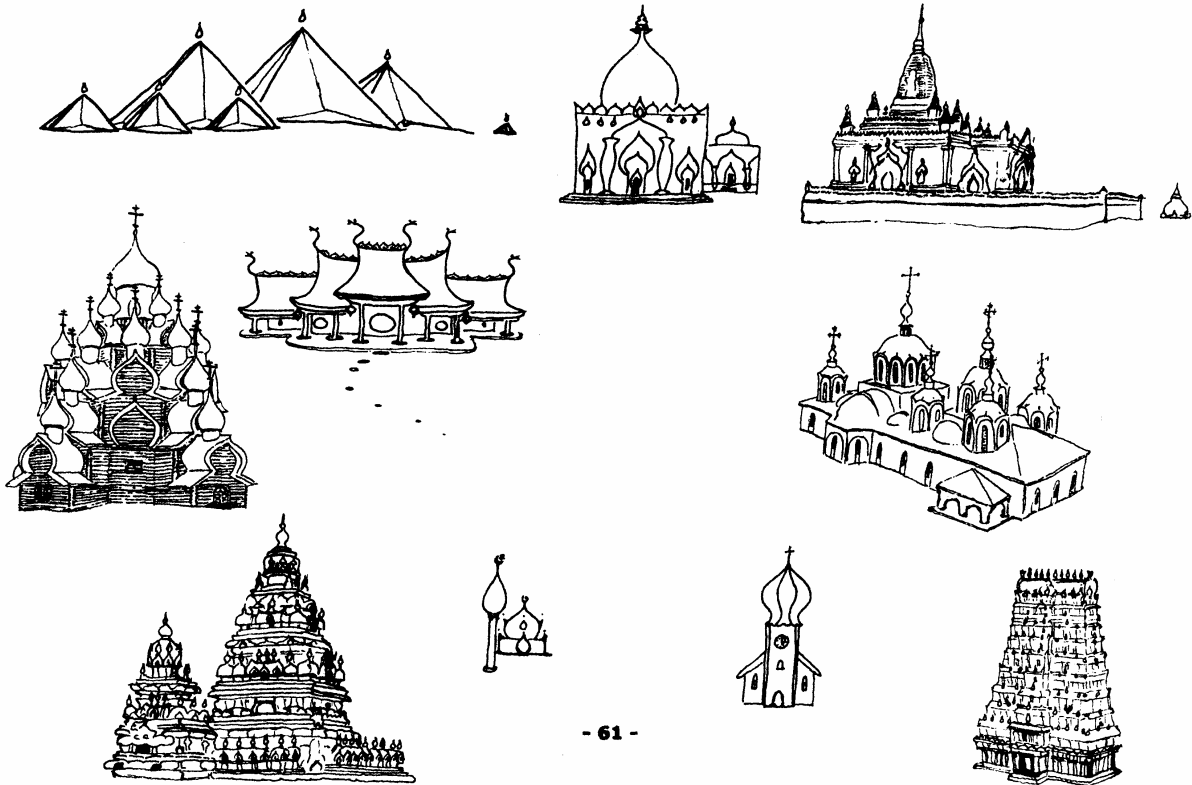

- Sri GANESHA , Quetzalquatl , a BIPAL – tree – leaf – and a drawing of the 7 – caved origin of all human beings described in Mexican Toltek – traditions , – where same – alike as in Christianity with the Ω – OMEGA – MEGA – " OM " , – also here , all human beings should come (- from their mythological deliveries) at last back home to .

- 68 -

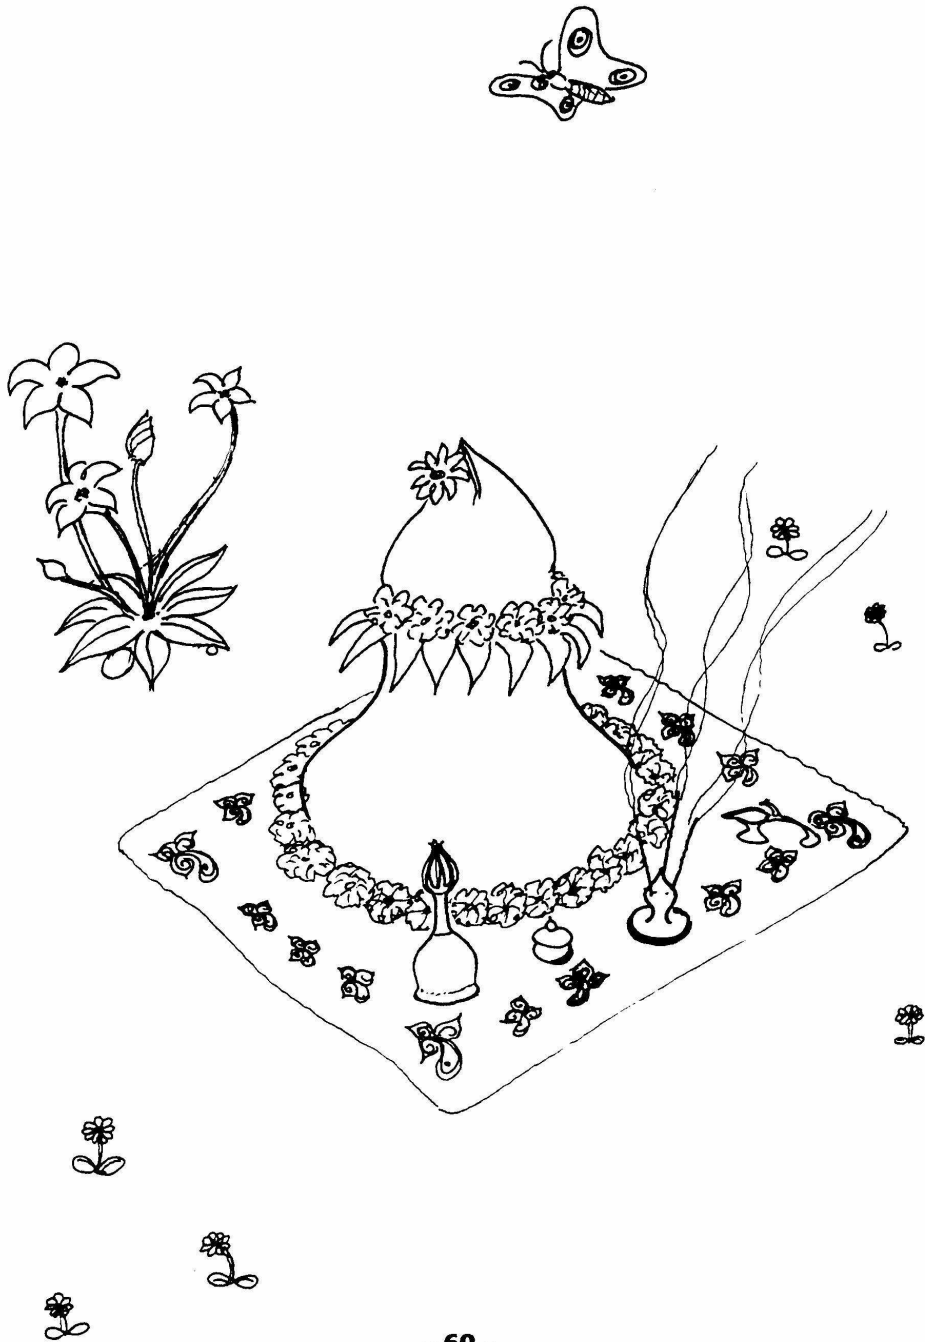

All over the world (- same - alike of the onion - shaped domes of temples , churches etc. , - here -) we find also as the transformational and highest healthy top of our highest valuable temple - our own body , -

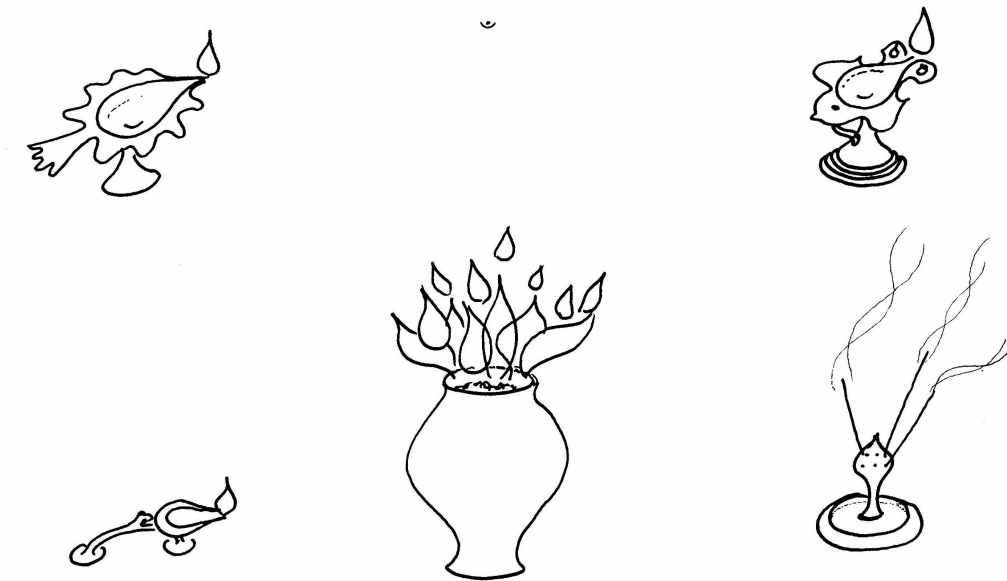

- in many old traditions " **OM** " - whirl - adequate ceremonial or everyday hats , - here from Egypt , also the mitre from the bishops in Christianity , of Mongols , out of Iranian - , Pakistani - and **Bharatiya** - traditions ,
 (- whereas also the in the divine breath waving feathers in the crown - alike ceremonial - sacred hats of the **North - and South - American Indians** , - are also heavenly -
 " **AUM** " - whirl - structures ; -)
- on the top , the crown of **DEVI - MA** (- also according to the vase of **AM-RITHAM** on the heavenly top of temples , - or similar to the **SHEKHINAA** - the crown of the Godly holy mother - aspect in Jewish traditions) .

Resides **Lord VISHNU** in an towards the sun opened lotus – flower , – symbol of a most beautiful blossoming “ **AUM** ” – whirl – structure and an open **Sahasrara – Chakra** , – of purity and of an **Agni – Hotra – Yajna – alike** manifested terrestrial **sun – point** with (- after **Yajna – Holy - Fire - ceremonies** , - being manifested as an energetic pillar (- sometimes from a few - till maybe **50 – or 60** meters diameter thickness) ; - whereas the outside **Holy – Fire** represents always the inside of ourselves burning Godly fire of love ; - so through this process of -) to the heaven rising full composition of supra – mental healing – energies and golden – frequency ,

- all over the world we find just at these highly special healing points , (- and also as from far away seen symbols of them , -) – onion – or “ **AUM** ” – whirl – structured shaped domes and vase – like figures on the top of temples , churches , mosques or wherever (- here also on top of the Egypt pyramids ; - “ **Pyros** ” – means **Holy – Fire** ; -) , – always to calm down (- also of otherwise unwelcome radiating - and also in the process of prayers of the congergation coming out of - or being just transformed for cleansing inside our bodies , -) subtle energies for transforming – and (- boosting up the soul – powers and vitality -) healing – purposes .

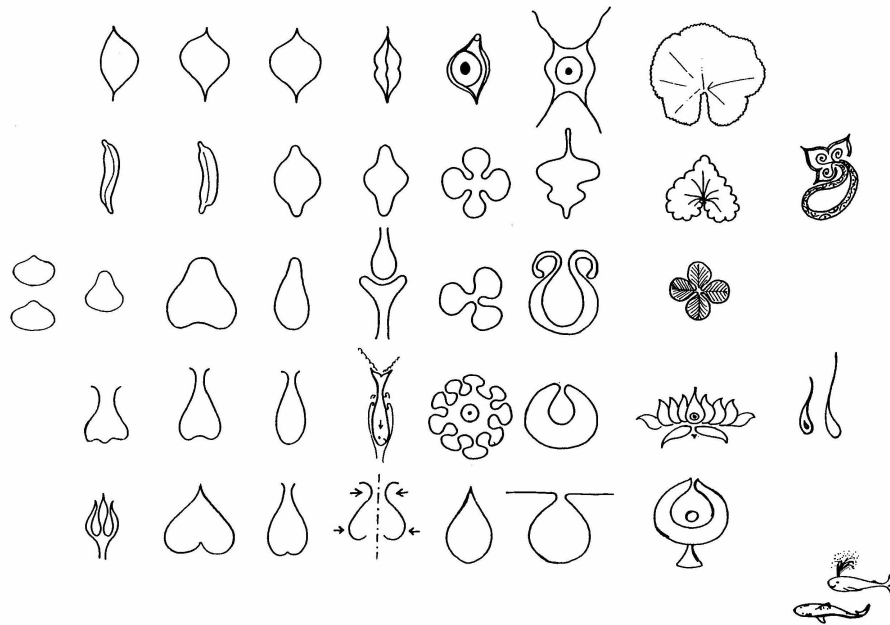

- 67 -

Also all holy – sacral items , tools and vessels (- of all old religious traditions all over the world - ; - but here especially and most beautiful in **Bharata**) -

- like the **KHUNDHAM** (- the vessel in the left hand of **Golden GANESHA** -) , - the vase of **AMRITHAM** , the holy oil – lamp , the bell , the incense – stick – holder , the small **AGNI** – light for offering **AARA-THI** , the holy water – vessels , -

are basically (- same like for example also old **baptismal fonts** and the **Eucharistic chalice** in **Christianity** - ; - also in **Zoroastrian – Pharsi** - , **Buddhist** and all other sacred and spiritual healing – traditions all over the world , - in their very original base -) altogether **“ AUM ”** – whirl – structured .

Different natural forms and symbols , basing all on " **AUM** " – whirl – structures , – initiated through the mirrored double **S** – curve (- from down the **4.** drawing , - from the left – or right side ; -) differencing itself more and more , – in the horizontal – and upright direction ;

– where we recognize , – that (- beside of finding the forms of our nose , eyes , lips , of bananas , lemons , leaves , flowers etc. ; - but also (- what's also highly interesting , -) of glands ; - but -) as more these forms are getting more and more differenced , – nevertheless they may look sometimes increasingly a little bit deformed , alike the upper leaf on the right side ,

– but if we will come nearer , – just here the periphery of it is formed (- as everything in living beings) with very small regular shaped " **AUM** " – whirl – structured top – tips .

On the right side top , – we see the **Bharatiya** symbol of an angel – or **Gandharva** .

In many old temples we could recognize some of these forms (- You may just know now , what are real " **AUM** " - whirls and which not ; -) maybe as graphics , frescos or symbolic sculptures (- always to calm down and to transform the subtle energies for healing - purposes) ;

- in the **SAI – Kulwant Hall** (- as in many **Bharatiya** temples) , - (- beside of blooming lotuses , of rosettes , - sometimes also of sun – umbrellas , - all signs and symbols for the through **Yajna** and self – realization proceeded and generated golden – frequency and **sun – point** , -) we see such beautiful transforming drops at the capitals of the middle pillars , - as also as the buds of the lotuses around on the outside wall .

EARTH

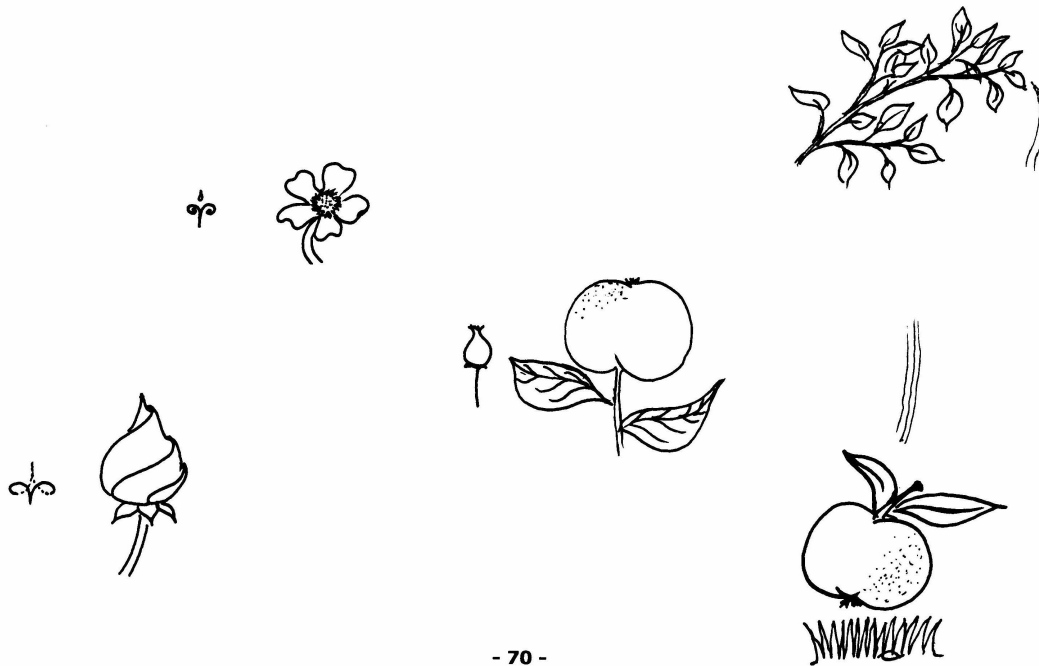

Here just everything what's really important in our life (- also for our understanding of ourselves - (- , down - an old one **baptismal font** , - upwards the symbol of **our heart** - and of our in front of our heart **folded hands** , - of **our head** ; - left - side also **the trident of Neptune** - and **Poseidon** ; - right - side - also two forms of **a Christian monstrance** , - to give all devotees as the environment the chance to see , remind and experience the glory of **Thee Absolute** inside the as **Divine Host** (- as our spiritual food and identification) manifested sun - principle ; - this also on the occasion of the annual celebrated (- our whole life symbolising) **Corpus - Christi** - **procession** ; -)) , - is - or is coming out of an " **AUM** " - whirl - structure .

- 64 -

Is the none-manifested reality of God , – symbolised and existent with all His powers and authority inside – and as a **Lingam** (- as **URDHVA – HIRANYA – SUVARNA – DIVYA – BHAVA – SARVA – SHIVA – JVALA – ATMA – PARAMA – Lingam** , -) in form or appearance of an **egg** (- , - also as **HIRANYA – GHARBHA** inside our body as our one spiritual heart and silhouette of cosmos) ,

– **He – it** (- , if not separated from His-Its female – aspect - ; - whereas , if we are able to recognise the Lingam with our bodily five senses , – also the form of the Lingam is also female and a appearance of **Shakthi – Devi** ; - the Lingam -) stands and rests forever on a ring – whirled – structured (- for Puja in its length , mostly north – south , in the sitting – direction to the rising sun – , respectively to the east placed -) spring – like or lotus – identical “ **AUM** ” – whirl – structured **YONI** – the **SHAKTHI** .

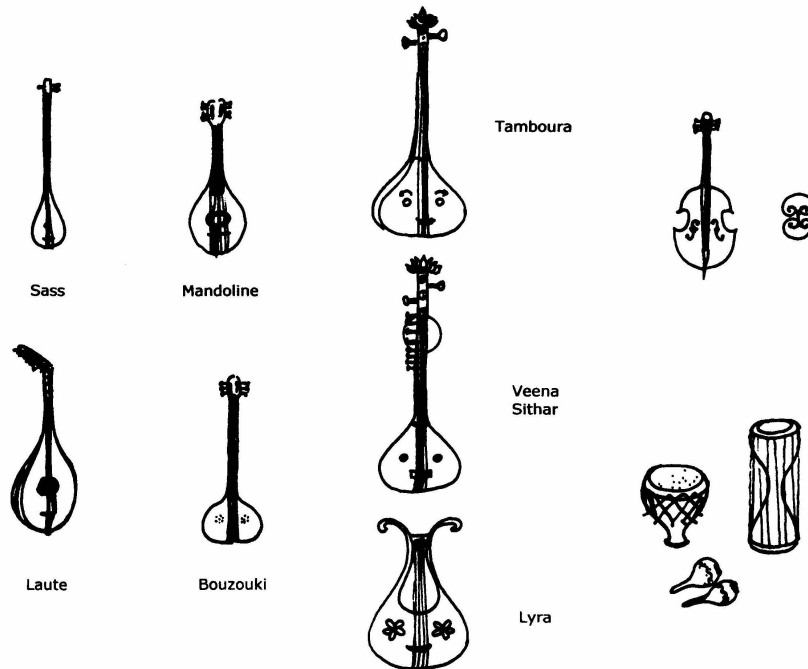

- 70 -

So by a deeper sight to nature and all her beautiful appearances , especially by all the (- outline - and shape - forms of) living beings , there are always only two kinds of forms existent :

- In the initiation - process , - **Lingams - eggs** ,
- and afterwards , - as lifelong silhouettes and also as finale implicated vortexes , - by moving , swimming , flying , walking etc. inside their specialized bio - spherical environments ,
- **S (- A -) - " AUM " - curved Yoni - whirl - structures .**

But many initiative - important evolution - steps (- also as in the evolution of a human foetus , -) (- here above we see the (- on many levels (- here also as tree of realization of the bible) highly interesting) progress of an apple) are proceeded also - for us visible through **The " AUM "** and transformative **" AUM " - whirl - structures .**

Also many old , especially for healing – procedures and – ceremonies used music – instruments are not only “ **AUM** ” – whirl – structured , – but are formed (- *what’s here highest important to achieve the full potential healing – and subtle transformation – results , -*) originally such well and nice , that they will create “ **AUM** ” – whirl – structures by playing them , – for example , alike – :

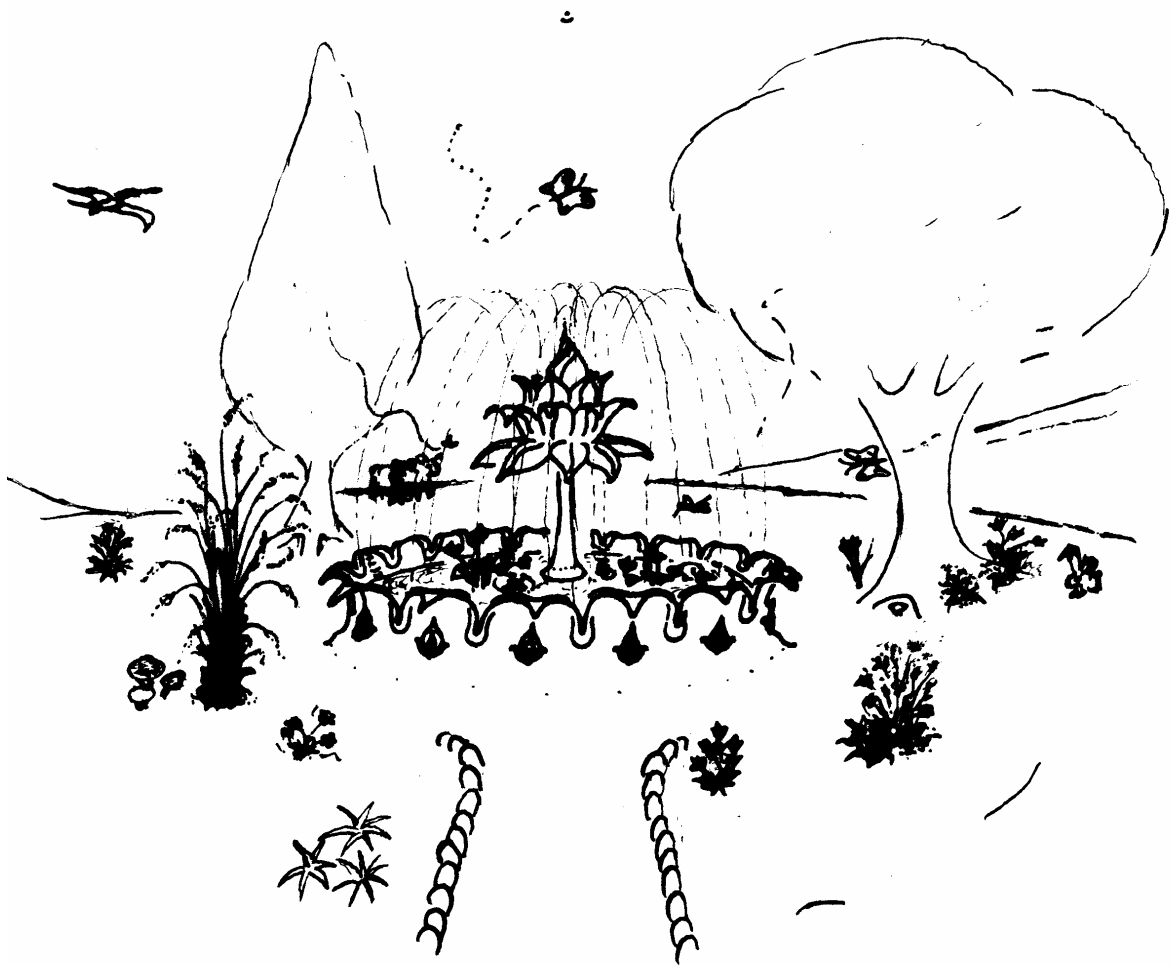

The holy **conch** , – holy **trumpets** (- also in Tibet , **gongs** and **sounding vessels** ; - in principle also the **Shanai**) (- in principle also the **Didgeridoos** from the Australian Aborigines - and all flutes like the **Murali – Bansuri** etc. -) , – many drums and rattles (- also in African – traditions) , – the **Damaru** , – the **Tabla** , – **Ghat-ham** , – the **Rudra – Veena** and **Veena** , – the ancient **Lyra** , – **Tam-purā** and **Sithar** .

Are **Bharatiya** musicians praying before of playing their instruments , – also here it will be very beautiful to clear our sacred instruments from “ **AUM** ” – whirls hindering forms and come back to the right – tuned keynote of “ **SA** ” – earth – tone (- a **Cis** of **136,1 Hz** , - on the basics of an **A** with **108 Hz**) .

- 72 -

Here the essence of meditation is described as the sun – principle inside the flame of the holy fire of love towards **Thee Absolute** , – whereas the ring – whirled locks as the “ **A U M** ” – whirled flame , – are showing us the powers of suchlike created – manifested golden – frequency and the according divine healing – potentials .

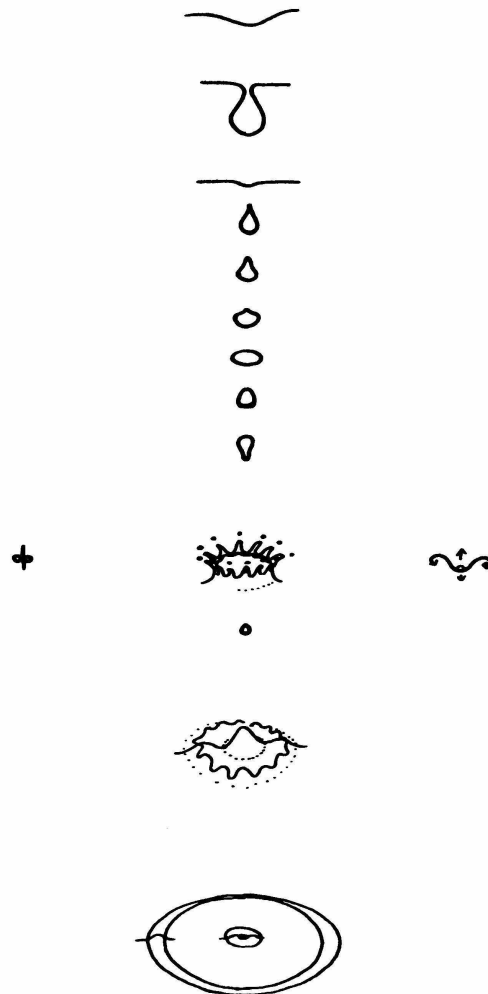

Several **Bharatiya** – temples (- like several other holy places all over the world , - where heavenly high – quality springs are - beside of sunlight (- here also in the connection of both , -) - the very basics of live , -) are having beautiful heavenly lotus – alike fountains inside of their holy ponds and springs , – as also lotus – identical stupas as symbols of the highest flower – and lotus – alike **SARVA – DHARMA** .

Are we knowing , – that wherever a lotus (- symbol of the blooming “ **AUM** ” - and love) is blossoming

(- in the deeper symbolism , – where (- here also always on the basics of through in – and outside **Yajna – Agni – Hotra** – Holy – Fire , created holy healing – frequencies , -) the **Sahasrara – Chakra** is getting opened towards **The Absolute**) ,

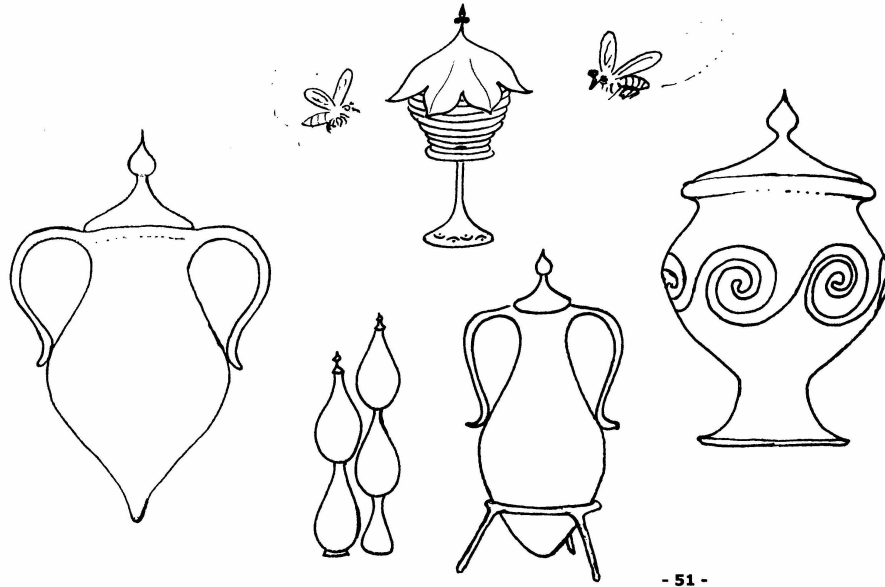

MEDHA – DEVI – SARASVATHI – SANATHANA SARATHI – ATMA – JYOTHIS is here .

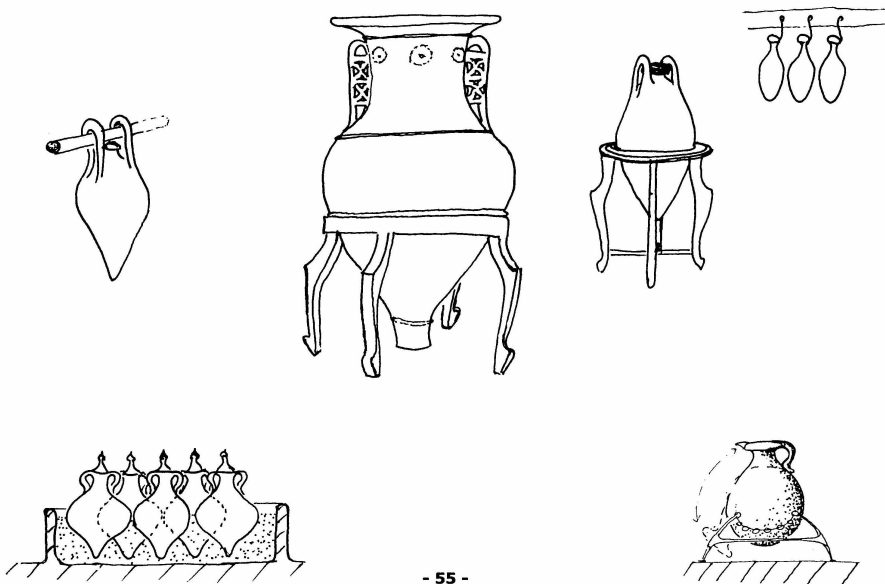

A drop of water , falling (- here just before falling from a branch or leaf of a tree , - shaping himself to a " AUM " - whirl - structured YONI - or amphorae - form -) inside of water , (- but before creating an new " AUM " - whirl - structure on the water - surface ,) - he's formed to any possible figure , but never to a pure circled sphere ,

- likewise (- out of its different subtle energetically effects , -) all living beings and nature are using (- for and out of subtle energetic healing - purposes) only some special forms - and (- nevertheless out of our mind we are sometimes thinking of , that they should be also possible , the nature -) avoid other ones (- like cubes , cylinders , circled spheres , oloids , möbius - bows , or also any kind of knots , -) strictly .

Amphorae

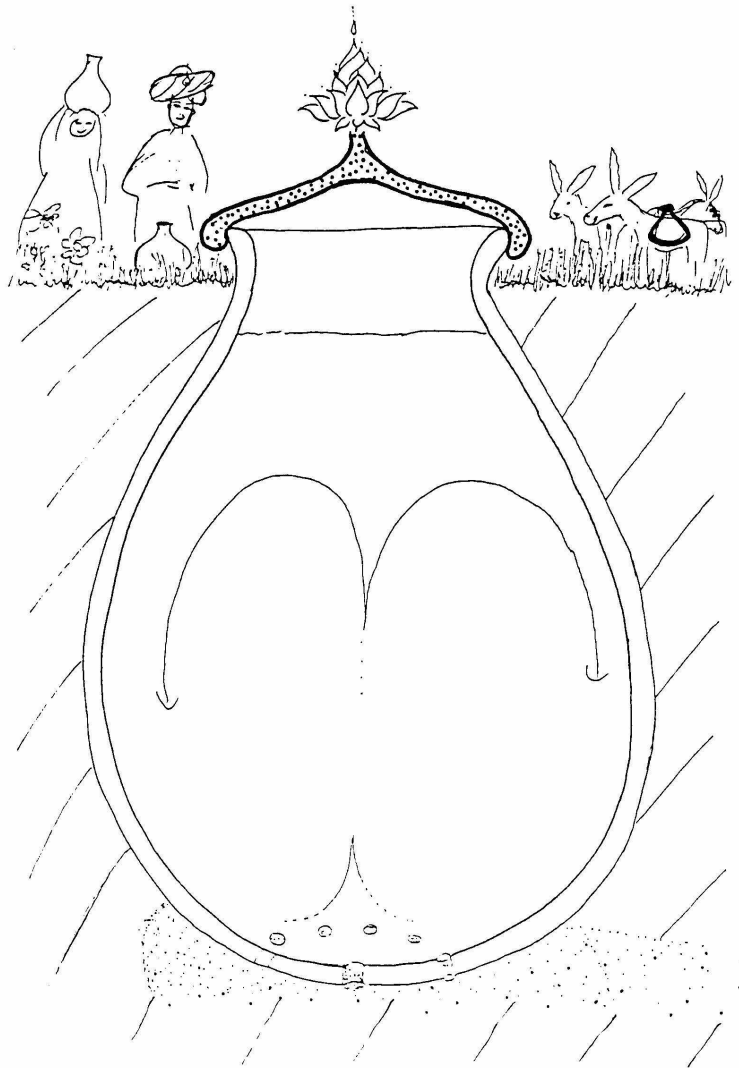

Some old - type , - on the subtlest energetic levels highest advanced vases and amphorae (- ; - on top an old German Black - Forest bees - hive) .

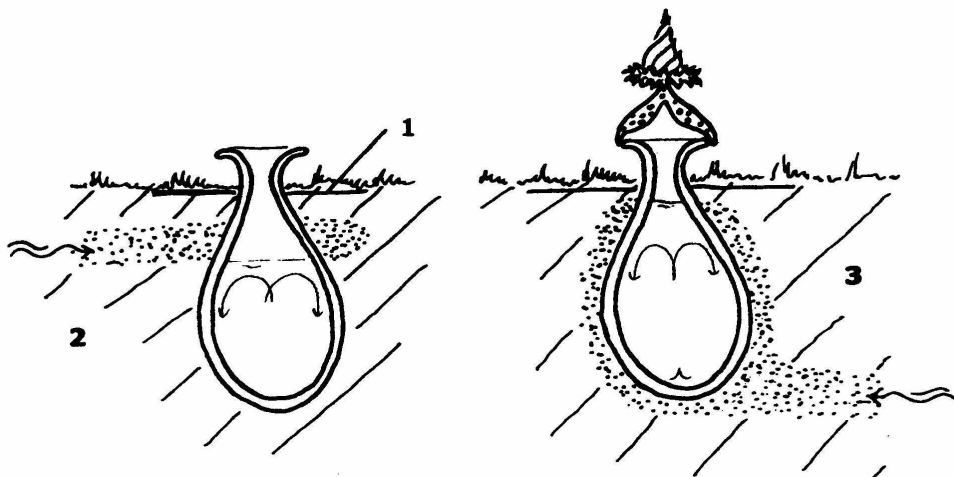

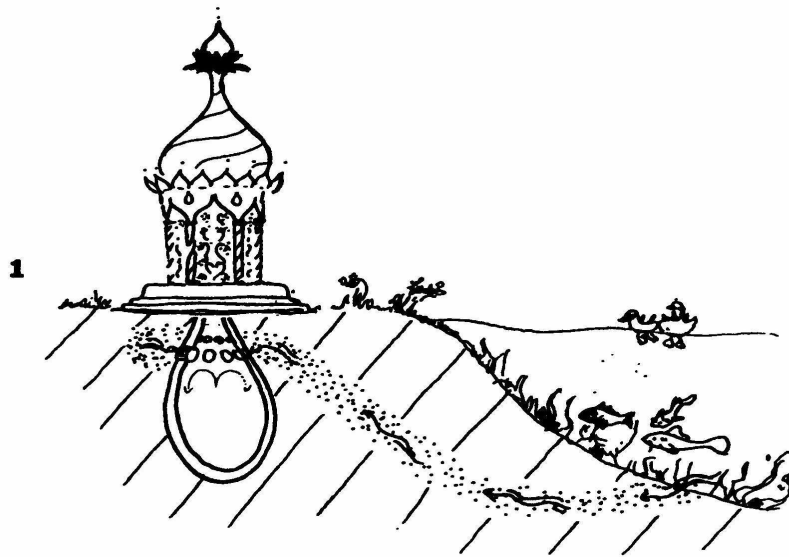

Some old or ancient constructions for amphorae - storage .

Cisterns

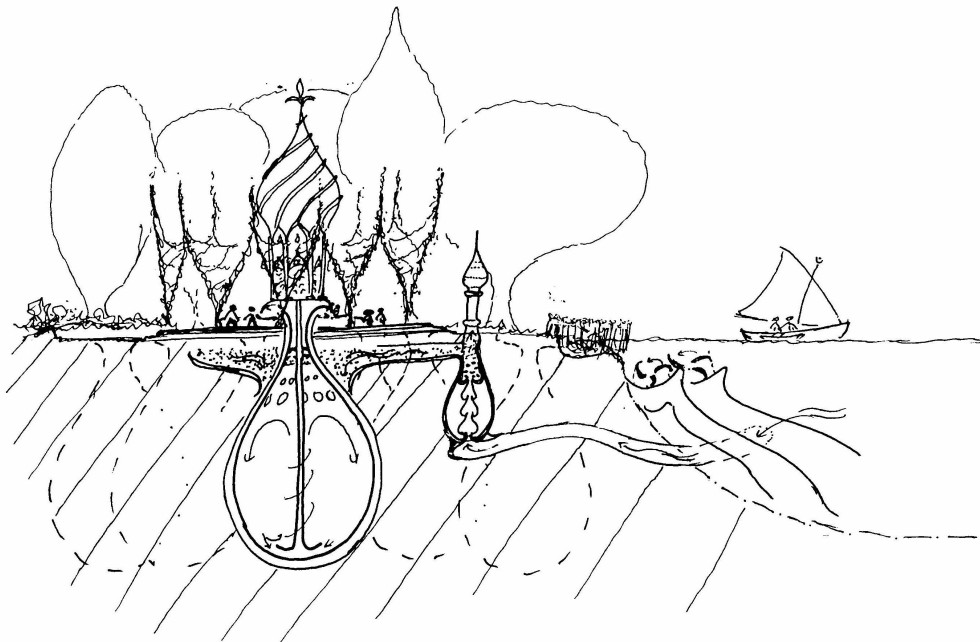

“ AUM ” – whirl – adequate water – vessels and cisterns .

“ **AUM** ” – whirl – adequate water – cisterns with different natural earth – and sand filter – systems , – also for seasonal filling and storage (- also for agricultural use , - when the water is in monsoon – times fresh and enough ; - and which could be arranged in principle standing one by one by side according of the usage , -)

– creating also self – cooling and (- helping the water to stay fresh , cold and clear) transforming “ **AUM** ” – whirls inside .

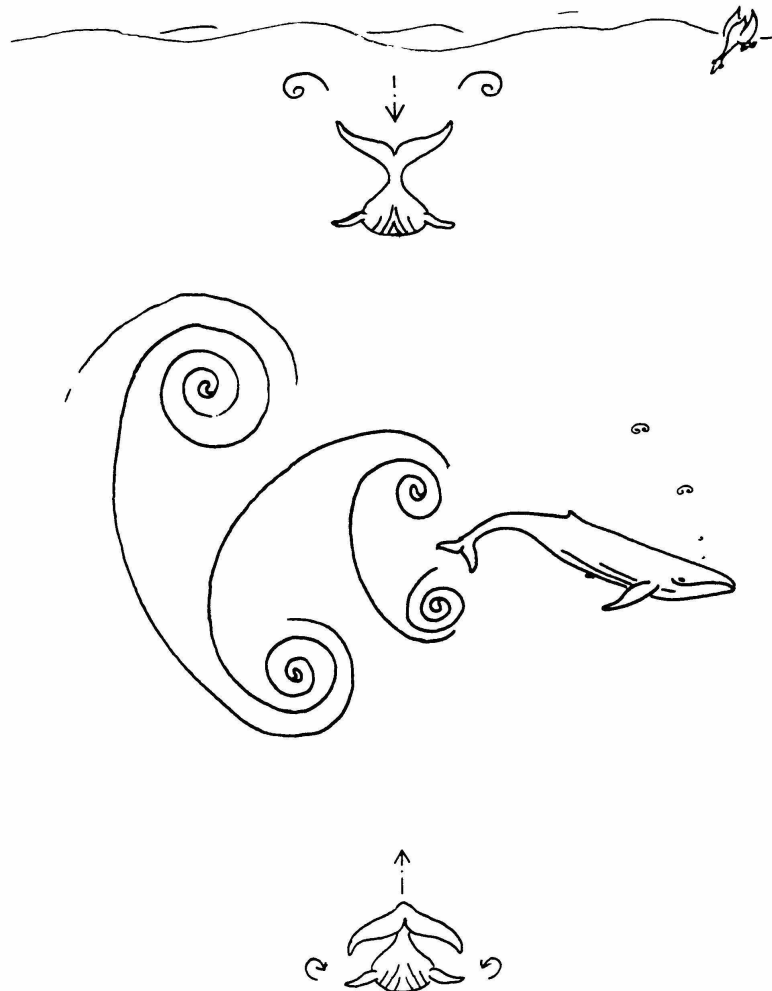

- 53 -

A bigger cistern – composition (- beside of storing (- maybe of only seasonal available and with best in front of filter – systems , - mostly agricultural used) waters out of a nearby lake or river (- ; - the best drinking – water is coming out of high – levelled artesian mountain – springs and could be stored alike) ; - here maybe then also at best through additionally preparing and blessing the centre of the structure with a through **AGNI – HOTRA – YAJNA** developed **sun – point** (- maybe at best inside of a positive **Benker – net – point**) , (- maybe here also with the help of a burrowed **SHRI – YANTRAM** , - of planted (- or asked for growing here) **TULASI – DEVI**) , - then also to transform and powering up the whole surrounded landscape and water – bodies - with the huge “ **AUM** ” – whirls and “ **AUM** ” – whirl – structures , - all around) ,

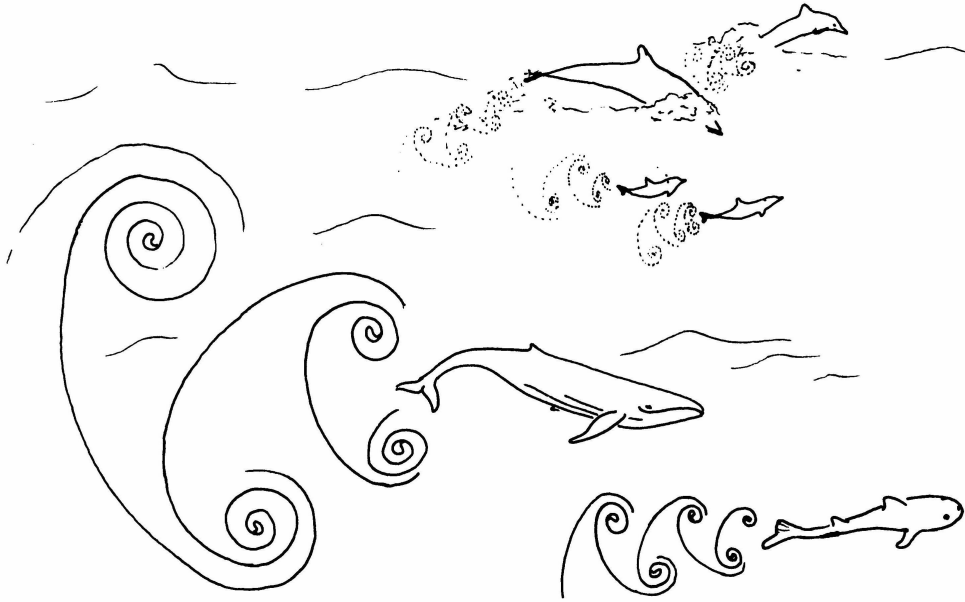

- with a small temple inside to express gratitude towards – and enjoy blessings from **UDAKA –** and **JALA – DEVI** , – surrounded by a (- with lovely plantar arcades , - as with trees shadowed and cooled down , - and with inside living birds and blooming flowers -) maybe beautiful little park .

Healthiest "AUM" – Whirl – Structures inside of Nature

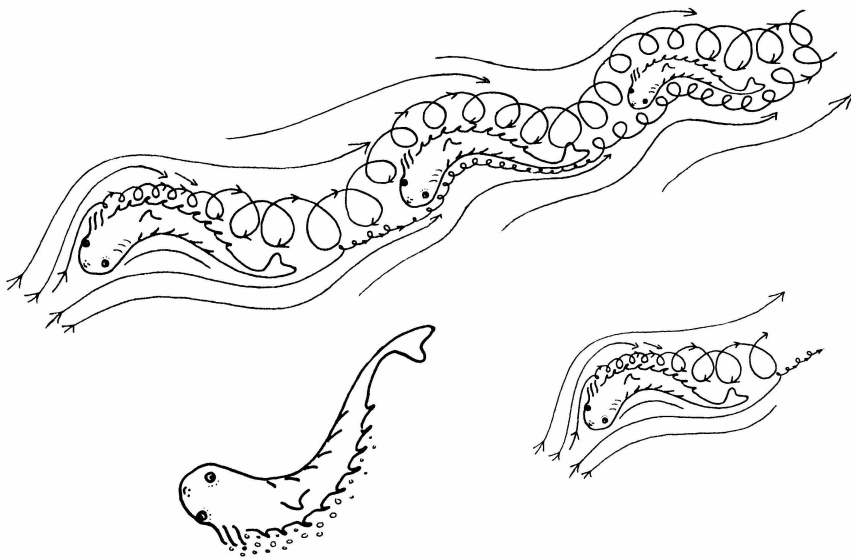

- 192 -

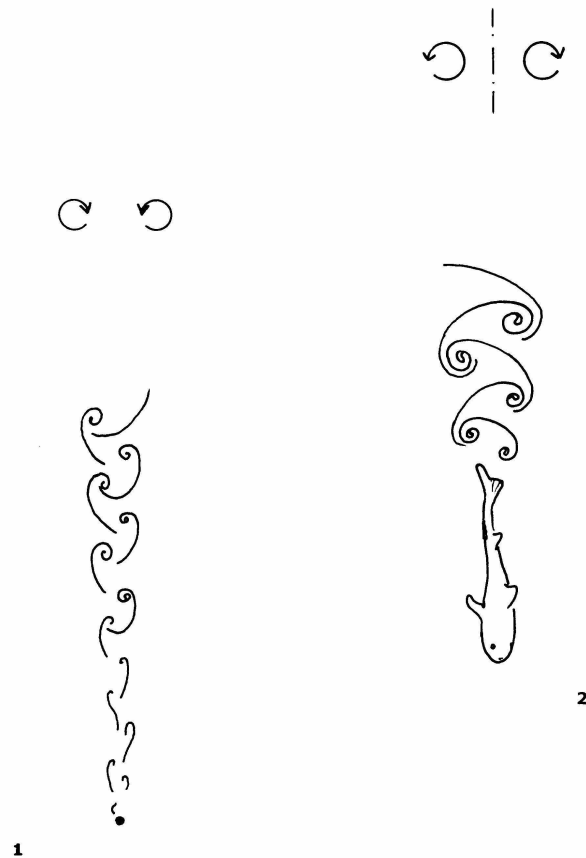

The highest environmental subtle – energetic bio – spherical health – aspects of appropriate lovely indicated "OM" – whirl – structures through as much as possible happily living (- "wild" -) animals and plants (- here the whales inside of oceans , - who are generating together with all other animals inside their elements such highest valuable healthy conditions , - that even from an environmental – technologic view , - we have to protect them totally and however possible) .

- 194 -

- 189 -

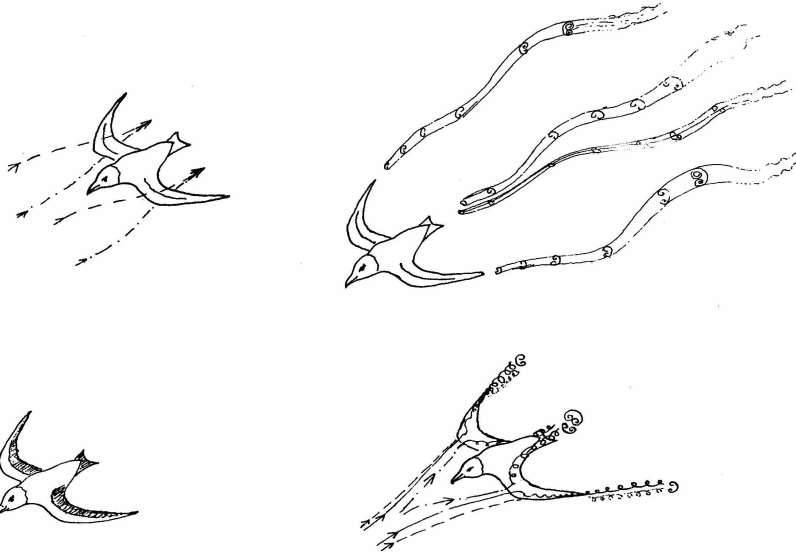

Under - 1 - (- an upwards flow , - whirling around a stick , stone , or a pillar , -)

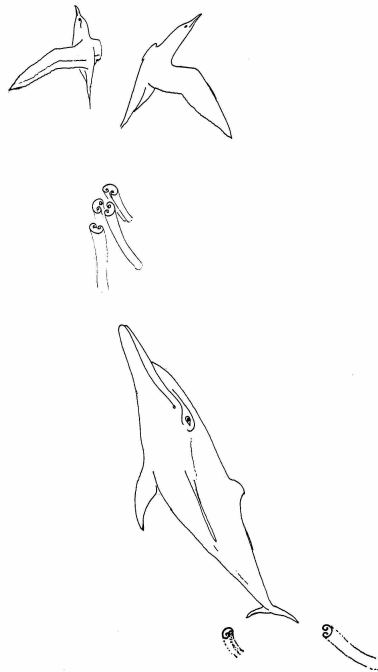

- the (- on the subtle level - ; - just as all our nowadays technologies) (- as I`m calling them -) **Integrative** – and pressures (- also being psychologically attached to - and a solidifying of subsisting subtle energetically conditions) generating (- , inside of nature as much as possible avoided) whirl – structures .

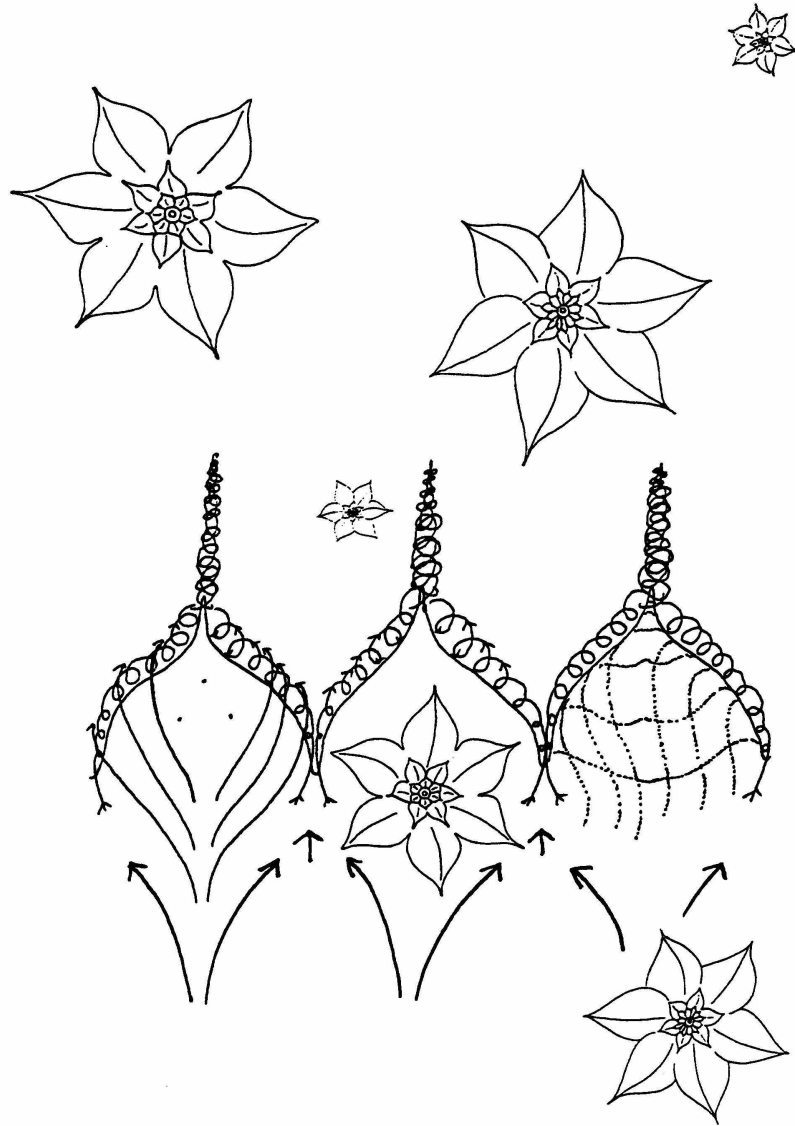

Under - 2 - (- a swimming fish , - initiating -)

- the all healthy conditions – with all its delighting valuables generating (- or as I`m calling them -) **Transformative** – or “ **AUM** ” – whirl – structures .

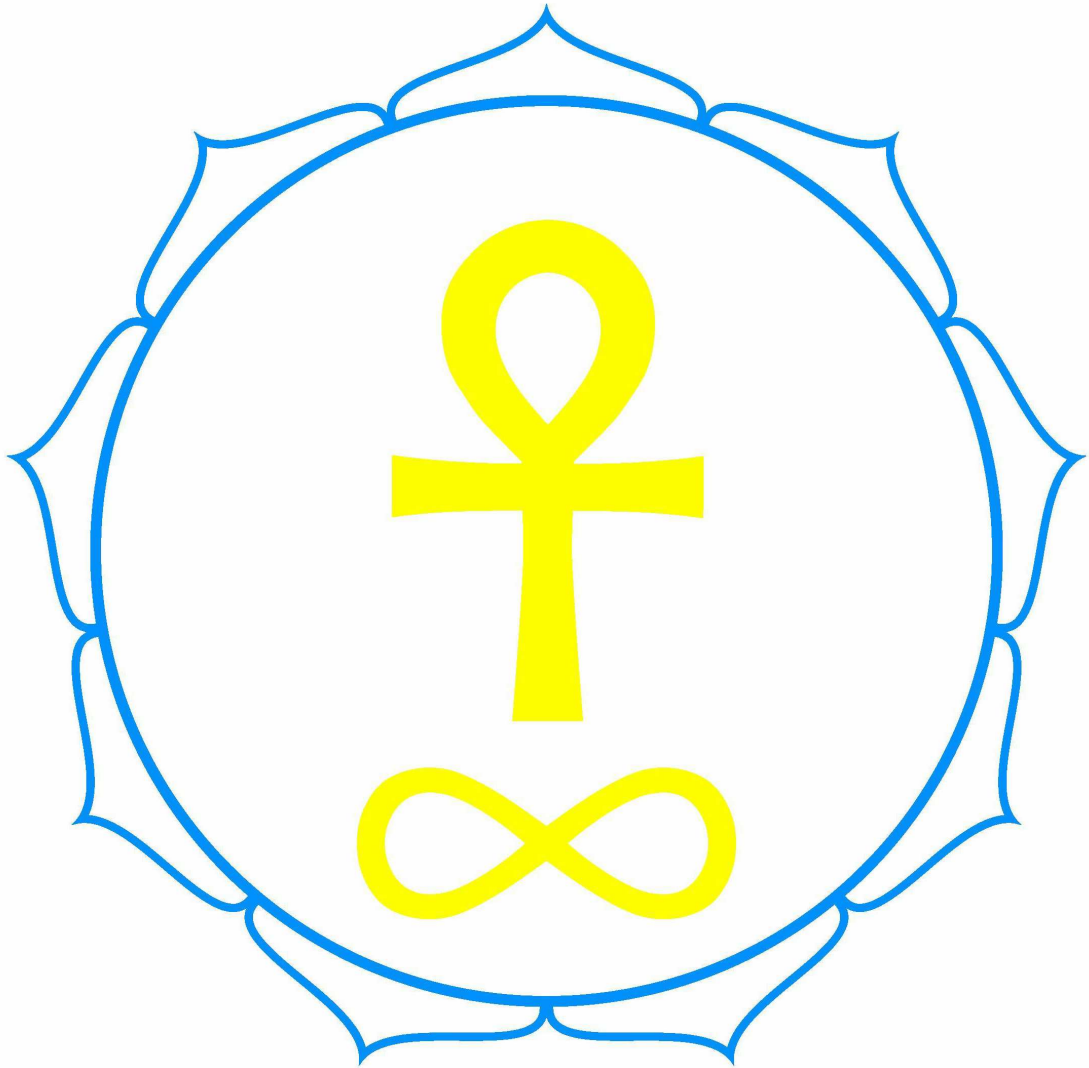

Highest healthy **transformative** "AUM" – whirl – structures

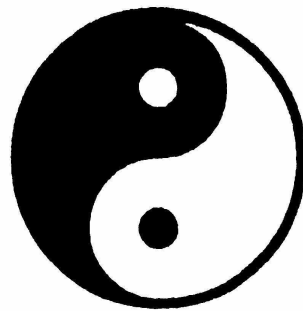

Whirls and flows of air , – while swirling through flowers and leaves .

The inner significance and connection of **Thee " OM "** with the principle of **" S "** (- here beside of the seed of **" SA "** and **" SATTVA – SATTYA – SARVAM "**, - also as the symbol of the growing – frequency representing and protecting serpent **AADISHESHA** (- or the golden dragon) of the awake **KUNDALINI** ; - as also the sun – principle) and well – proportioned **S** – curves (- on highest levels also for other shaped minerals etc. transformative , - through alike – formed galaxies ; - on earth -) inside of all living beings structures .

SUBRAHMANYAM

- with the (- as the power of **Moksha** from **PAARVATHI** presented) **VeI**

Is **SRI GANESHA** (- **GANA – ISHVARA**) , - Thee **Deity** of our first - **Muladhara – Chakra** , - **Guru** of Yogis , - Remover of obstacles , - Protector of priests , - full of sympathy , compassion and mercy , - offering and guiding all plantar as spiritual growth , - having and presenting everything what's essential for - and in life ,

Lord SUBRAHMANYAM , - **Deity** of our 7th **Sahasrara – Chakra** , - represents (- *and is*) the most advanced **ATMA – LINGA – status** , consciousness , **Dharma** , character and value , - man (- from **MANU** - Sun - God -) could achieve - and all evolution leads to .

Are we praying inside of a **PUJA** (- inside of life , -) at first to **SRI GANESHA** to bless and give us just everything , - what's good , helpful and beneficial for everything , everyone , us and all , - and at last also to **SUBRAHMANYAM** , - (- nevertheless **THEE " AUM "** is always here , -) there are also two highly differentiated (- *and to each Godly aspect belonging to*) "**AUM**" - whirl - structures .

Is there now anything which is extremely difficult to harmonise or to transform on subtle levels (- *here especially to cleanse and overcome of karmic , emotional or mental energies , - also in our nowadays high - technologies -*) , - we are in highest need of both , - of **SRI GANESHA`S** - and of **SUBRAHMANYAM`S** - "**AUM**" - whirl - structure - ; - at best together with holy - fire - blessing and bell - ringing , - respectively of additional **YAJNA** and **AARATHI !!!**

Was - or is **Lord SUBRAHMANYAM** flying on his peacock **Paravaani** (- *a symbol of our own body , - discovering the mystery of the outside cosmos , - and filling up anything with value , consciousness and love -*) , - behind of **Paravani** (- *as we see it in the peacock - feather's eyes , -*) there is remaining behind , - (- alike around of **KRISHA** as embodiment of **SAT – CHIT – ANANDA** , -) only **THEE Absolute of THEE**

- "**AUM**" !!!

Are all these (- *in the deep , soul – identical -*) sacred technologies reminding us

- **of our all ancient and primordial one reality and culture**
 - **to the behind One , – behind of all old religious traditions**
 - **to our all one Absolute and absolute Reality**
 - **as to the unity of mankind creation God and cosmos ,**
- beside of the deeper understanding of nature phenomena (- *like the function of special whirl – processes in our all bodies and in lakes and rivers , - or the subtle processes when the wind is playing with plants and leaves , - through cloud whirls and inside of storms ; - also for the understanding , why we should love and strictly protect all (- especially wild) animals , - here especially all birds , insects and the fish and whales in the oceans , - to protect and secure the healing whirls ; -*)
 - and a huge strengthening of the organic – sustainable agriculture (- *also to transform and heal whole (- maybe before through chemical fertilizers fungicides pesticides etc. destroyed or polluted , -) environs for healthier and better as more growth ; - as for a healthier life inside of towns ; -*)
- all above could be used also technologically , – for the construction of in future in their subtle mechanisms and functions then **all blessing – alike –**
 - **“ AUM ” – Soul – and nature – system – identical** (- *then supporting the earth - also on subtle levels – in her self – healing processes*) technologies ,
- like new (- *in their subtle functions and whirling – processes , - high – quality drinking – water securing and generating*) water – tubes , for healthy (- *no electro – smog radiating anymore , -*) electrical wires , new turbines , generators , for high water – and flood – prevention systems , – for healthy **“ AUM ” – whirl – structures** generating aeroplanes , ships , cars and trains , – as well as for the nano – and for the electro – technology (- *like to optimize the healing – effects in medicine for machines and apparatuses for dialysis , diagnosis , treatment and therapy*) .

Is all (- *also this here above opened*) knowledge nearly useless ,

- if we don't take (- *especially here*) the chance to use it in a pure **Satvic** way and **manner** (- *beside of recognizing thus **Thee Absolute** inside of all beings , same inside of ourselves as everywhere around , -*) – for the entire good and for the social – ethic – ecologic welfare and happiness of every – **One** and **All** ,
- we should use all this to solve the real problems of the world , – of poverty , hunger , migration , drinking – water , reforestation , agriculture , environmental pollution and contaminations etc . , – of distressing work and hopeless unemployment , – but also of the social forlornness and individual confusion also in western and rich called countries also **!!!**

So very pleased , if **You** and **You All** would be interested to go ahead – or to integrate these technologies plus the related values inside of **Your** professional fields and tasks (- *here especially for organic farmers , - of storing transporting or working up of vegetable and fruits , - or in the whole range of medicine , of Ayurveda etc. , - but also for restoring of riverbeds and reforestation , -*) accordingly ,

- I wish us **All** a same exiting as inspiring view and outlook , – as an happily as prospering **Prashanthi** – identical – alike working and living together **!!!**

Nearer information **You** could welcomed get over –
